

COURSE OUTLINE

An Introduction to Emerging Maths

Aims:

The aim of this session is to support learners to develop their knowledge and understanding on how to support children's emergent mathematical skills.

Objectives:

By the end of the workshop learners will:

- Understand the statutory requirements for developing emergent maths within the Early Years Foundation Stage (EYFS)
- Understand Education Inspection Framework (EIF) requirements from Ofsted in relation to supporting children's emergent maths skills
- Consider how effective pedagogy can support emerging maths through
 - Enabling environments
 - Pedagogical interactions
 - Pedagogical content knowledge
- Have explored how the application of teaching strategies can support the development of children's emerging maths

Target Audience: Practitioners working within the Early Years workforce

Duration: 3 hours

Cost: £25

Certificate: Includes Certificate of Attendance
